and The Bandwidth Capacity Team
Join New Front End Sales and
Marketing Alliance Company to Distribute Voice,
Data, Internet and Professional Services
to Their Agent Channels.**

*Tier 1 Carriers Multi-Branding Marketing Company Consolidates
Scope of Service Offerings Under One Umbrella*

CHICAGO, August 30, 2004 – NetComp Communications, a top AT&T Authorized Agent specializing in Internet and data connectivity, recently joined a new sales and marketing company that will represent three distinct business units under one name. The alliance company known as Tier 1 Carriers Corporation, has formulated three separate businesses to make it easier for agents to procure voice, data and Internet multi-branding solutions.

The business units are NetComp Communications Group, TierOne Communications and Bandwidth Capacity Team, all marketed through Tier 1 Carriers targeting agents across the nation with a comprehensive offering of voice, data, internet and professional services.

The first business unit, Netcomp Communications Group, is one of the nation's top AT&T Authorized Agent, specializing in Internet, voice and data connectivity. NetComp has teamed up with AT&T and provides competitive quotes and superior service for the bandwidth needs of any business.

NetComp has been a leading high technology products and services provider to the international business community for 7 years. State-of-the-art networking and communications products and professional service are aggressively promoted to a wide range of businesses. The company is a powerful resource to its clients and has an unparalleled reputation for designing, maintaining and managing the complex systems it sells.

TierOne Communications is multi-branded, offering comprehensive solutions including WAN services, technical consulting services, networking monitoring and equipment. TierOne Agents have the opportunity to join the BellSouth Certified Marketer program, one of the best in the industry.

Bandwidth Capacity Team is the demand generation company responsible for new business leads and creating a market for all voice, data and Internet service offerings. Its carrier relationships include MCI, Qwest, ACC, and New Edge Networks.

"Under the Tier 1 Carriers umbrella we have the most comprehensive set of solutions in the market today," said Joe Osborne, CEO and founder of NetComp Communications. "With this new marketing organization in place it will now be easier and more cost-effective for agents and their customers to obtain the multi-branded telecommunications services they require at the most competitive prices."

ABOUT TIER 1 CARRIERS
